

N Times Cleaning Power
The new generation of dual power fluid vortex technology

With the aid of vacuum negative pressure and three-zone vortex probe, the new generation of dual-power fluid vortex technology can fit the skin accurately from different angles, suck the dirt in the pores efficiently without damaging the skin and introduce the natural plant extracts into the skin at the same time. It combines "inhalation" and "conduction", so as to achieve cleansing and nourishing effect to purify, moisturize and rejuvenate the skin.

Three-Zone Vortex Probe
Exfoliating Soft Blade
Dirt Inhalation
Essence Conduction

The three-zone vortex probe adopts the three-zone design of "exfoliating soft blade, dirt inhalation and essence conduction". At the same time, with the rounded and non-sharp process, it can fit the skin accurately at different angles, and does not irritate or damage the skin while using.

N natural plant extracts 3 steps to cleanse and nourish one's skin

Non-intrusive combination of "inhalation" and "conduction" with natural plant extracts. N times the cleansing power to purify, moisturize and rejuvenate the skin.
